Art Unit: 2636

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 11-21 and 30-37, drawn to a system for fusion of image and environmental data, classified in class 340, subclass 971.
- II. Claims 22-29, drawn to a display system with velocity and acceleration data, classified in class 701, subclass 14.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a fused image and environmental data display would not have required velocity and acceleration data. The subcombination has separate utility such as an aircraft operational performance display.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brent A. Swarthout whose telephone number is 571-272-2979. The examiner can normally be reached on M-F from 6:30 to 4:00.
